

Variable Report - Tables

Joint EVS/WVS 2017-2021 Dataset

Tables of the 1st release, November 2020 (v.1)

Related to the Joint EVS/WVS, Version 1.0.0

GESIS: doi:10.4232/1.13095

WVSA: doi:10.14281/18241.2

European Values Study (EVS)

World Values Survey (WVS)

Documentation provided along with the data

The purpose of the *Variable Report–Documentation* is to explain the structure of the common EVS/WVS dataset and its correspondence with the EVS 2017 ([doi:10.4232/1.13560](https://doi.org/10.4232/1.13560)) and WVS7 ([doi:10.14281/18241.1](https://doi.org/10.14281/18241.1)) source data files.

It describes the Common Dictionary agreed by EVS and WVS, the international and survey specific standards that form the basis for harmonizing the data, and provides information on the recoding that was necessary to map the common EVS and WVS core questions.

The *Variable Report–Tables* provides frequency counts for almost all variables. Results are weighted by *gwght* and usually broken down by country/territory. For variables with long lists of real values (e.g. age), results are only presented for the corresponding categorized variable if available.

The Excel file *Joint EVS/WVS Variable Correspondence* provides an overview of variables included in the Joint EVS/WVS and the source datasets EVS 2017 and WVS7.

The Excel file *Joint EVS/WVS Participating Countries and Territories* provides an overview of countries and territories included in the current version of the Joint EVS/WVS and summarized information on fieldwork.

The documentation provided on the Joint EVS/WVS is available via the [EVS](#) or [GESIS](#) websites and the [WVS website](#).

A comprehensive documentation of the EVS 2017 and WVS7 source datasets (guidelines, master/field questionnaires, methods and variable reports), which not only helps users to explore the data, but also shows how the recommendations and standards have been implemented to allow for an assessment of data quality, is available on the [EVS 2017](#) and [WVS7](#) websites.
